As a MIS professional, your employment opportunities are innumerable. You might work within a specialized industry such as health care, telecommunications, retail, utilities, financial services, or in one of the many technology-related products and service companies.

For exposure to a variety of different industries, consider working as a consultant at one of the major consulting firms. Companies call on IT consulting firms to implement a variety of technological solutions, analyze their IT operations, or take over entire IT processes. The MIS concentration can be paired with multiple other concentrations and a variety of minors. Popular choices include strategy and innovation, finance, accounting, and entrepreneurship. Additionally, many students also seek minors outside of Questrom and interest can range based on the area most interested in. For all available minors, please visit the Boston University programs website found here.

For more information on required courses please visit HERE.

**BUSINESS ANALYST: INTERNAL AND/OR EXTERNAL CONSULTANT**

Their main focus is identifying opportunities for improving a business’s processes and using technology to eliminate problems that affect productivity, output, distribution and ultimately, the bottom line. So, knowing how technology can solve business problems is vital to a business analyst’s success. This is the most common track for Information Systems students. 85% of hiring positions in the IS area are either for Internal consultants who work for corporations and address the implementation of new Information systems or maintaining Legacy systems or Consulting Systems Analyst who work with external clients. Both corporate and consulting opportunities have job titles similar to Systems Analyst, Business Analyst, Forensics Analyst and System Integration Analyst.

**INFORMATION SYSTEMS ANALYTICS**

Systems analysts utilize an organization’s IT systems to help achieve strategic business goals. They may design and develop new systems by configuring new hardware and software, or use existing systems in new ways to accomplish additional or different outcomes. Organizations such as Google, Hubspot, Digitas and others desire students who have both an information systems background as well as some marketing analytics in many cases.

**WEB DEVELOPER**

Web Developers work closely with marketing and design teams to develop, launch, and maintain marketing content. They also work to achieve SEO goals and brand/visual style for a company. Some technical skills needed in this area are HTML, CSS, and JavaScript.
POPULAR CAREER PATHS
